Subject: Scientific Assessment of Bristol Bay Region

Hello Ms. Steiner-Riley:

You and I chatted last summer when I was gathering information concerning the request, by Six Alaskan Tribes, for a 404(c) determination along the Kvichak and Nushagak watersheds near Bristol Bay. I read today that EPA has elected to conduct a "scientific assessment" of that area. Is there a protocol or scope or work or any other document that would give me some idea how that assessment will be conducted and under what program? Please let me know what guideline exists. Thanks.

Sincerely, Robert Reges
